### Fund Description

The objective of the Geiger Counter Fund is to provide investors with the potential for capital growth through investment primarily in the securities of companies involved in the exploration, development and production of energy, predominantly within the uranium industry. Up to 30% of the value of the Company's investment portfolio may be invested in other resource-related companies from outside the energy sector.

### Key Advantages for the Investor

- Access to mining assets in the uranium sector
- May benefit from embedded subscription share
- Low correlation to major asset classes

### Ordinary Share and NAV Performance<sup>2</sup>

	1 Month (%)	3 Months (%)	1 Year (%)	3 Years (%)	5 Years (%)
NAV	1.44	(7.72)	84.61	100.08	290.76
Share Price	8.60	(12.42)	46.76	45.19	188.83

### Commentary<sup>3</sup>

The spot U<sub>3</sub>O<sub>8</sub> was little changed in April, closing the month at \$89/lb. Uranium mining equities showed slight improvement following the prior month's consolidation. The Fund NAV rose 1.4% versus a 3.4% sterling gain registered by the Solactive Uranium Pure Play Index.

One of the prime detractors to performance was Energy Fuels, whose share price declined over 14% in sterling terms following its A\$341m all-share offer to acquire mineral sands producer and developer Base Resources with a view to processing monazite (which contains both uranium and rare earth elements) at its White Mesa mill in the US.

Nexgen ended the month around 1.0% lower in sterling terms as the group issued A\$250m shares at an effective 4.8% discount, providing the group with a secondary ASX-listing to take advantage of relative valuation differentials compared to their ASX-listed peers. Offsetting these declines, Fission and Ur-Energy made useful positive contributions with sterling share price rises of over 10% and 5% respectively.

In the run-up to the Trust's issue of embedded shareholder rights, broader sector news remains encouraging. Kazakh floods, caused by meltwater from a sudden spring thaw, helped support the uranium market and briefly lifted uranium mining equities. The floods occurred on the river systems in the west and northwest and away from southerly mine operations meaning the extent of disruption is expected to be limited. However, the event nevertheless illustrates supply vulnerabilities from the region (currently responsible for ~40% of global mined uranium), a far less discussed risk.

Before the floods, state-owned Kazatomprom's Q1 results disappointed with attributable production and group sales some 5% and 30% below market expectations. The company did however maintain its full-year guidance for attributable production of 28.3-30.9Mlb U<sub>3</sub>O<sub>8</sub> at a cash cost of US\$16.5-18.0/lb. However, it is worth noting that recent record on guidance has been optimistic.

Elsewhere, China National Nuclear Power Corporation provided 2024 investment targets indicating a +52% year-on-year increase. With 15 reactors currently already under construction, China's total nuclear power generation capacity is on track to exceed 100GW before the end of the decade, with the region overtaking the US as the largest nuclear power market.

India Atomic Energy Commission announced plans to expand nuclear output to 100GW by 2047, from around 8GW today. While extremely ambitious, it indicates the potential growth in nuclear in emerging economies.

(continued on the next page)

## Commentary<sup>1</sup>

In the US, PSEG Nuclear, which runs three nuclear power plants in New Jersey, announced intentions to seek federal approval for 20-year life extensions. This allows the plants to run beyond 2050 and is in keeping with recent moves by utilities in established nuclear power markets.

More significant for the continued positive sector outlook was news released just after the month-end that the US Senate passed a bill limiting Russian enriched uranium imports into the country. While the act has several waivers in place until 2027 to help ease the initial impact on the US (which generates approximately 19% of its electricity from nuclear power) possible consequences include increased uranium requirements from European-owned enrichment facilities. The act could prompt them to “overfeed” facilities, effectively processing greater quantities of U<sub>3</sub>O<sub>8</sub> for a shorter period to obtain necessary fuel grade product, thus increasing demand for U<sub>3</sub>O<sub>8</sub> and conversion. If a full export ban is enacted, there could be more urgency for utilities to secure long-term supply contracts as well as the potential for trade retaliation from Russia, both of which could put additional pressure on requirements in the near-term. This bill followed the release of a survey by consultancy UxC that indicated the need for more western enrichment and conversion capacity (crucial steps in the nuclear fuel supply chain) and significant new incremental conversion capacity will come online between 2028-29.

## AIFMD Leverage Limit Report (% NAV)

	Gross Leverage (%) <sup>2</sup>	Commitment Leverage (%) <sup>3</sup>
Geiger Counter Limited	118	118

Paladin Energy	10.2%
Cameco	8.2%
Uranium Energy	8.1%
<b>Top 5 Holdings Represent</b>	<b>63.8</b>

## Company Update

The Company has announced the results of the 2024 Subscription Rights Exercise. There is a cap of Euro 8 million on the total value the Company can raise from the exercise. There was a scaling back exercise done on the basis that all shareholders are scaled back pro-rata to their Subscription Rights, whether or not they have sought to exercise such Subscription Rights. The scaling back factor means that all shareholders received 70.96% of their entitlement.

On 7 May 2024, 12,314,071 new shares were issued at a price of 37.74p each as a result of applications received from shareholders. On 9 May 2024 a further 5,816,025 new shares were placed into the market at a price of 51.0p per share – of that amount 37.74p per share was credited to Geiger Counter Limited with the difference of approximately 13p per share (on the scaled back calculation) being credited to those shareholders who did not take up their subscription rights.

The Company has also announced the fourth Subscription Rights Price of 74.58 pence on 1 May 2024. The exercise date for the third Subscription Right is expected to be 30 April 2025.
